

A RETROSPECTIVE SERIES
ON TELECOMMUNICATIONS POLICY

VOL. 18 NO. 3

Former Governor of Maine - John R. McKernan, Jr.

Discussing: The Role of State Governors Regarding Telecommunications Policy and the Economy (1988)

John R. McKernan, speaking as Governor of Maine addresses the implications for State Governors, of advanced technologies, and the role of telecommunications infrastructure and the economy:

U.S. Senator - John H. Chaffee (deceased)

Discussing: His Perspectives on "International Trade Barriers - Equal Access to Telecommunications Market" (1985)

Senator Chaffee (deceased) addresses: International Trade Barriers in the Telecommunications Industry. He raises the questions of how to achieve a better balance in our bilateral trade relations with Asia including Japan. Consider his arguments that American producers of telecommunications equipment deserve the chance to compete in the market of their biggest competitors. Consider if Senator Chaffee's remedy can still be used in the years ahead.

Futurist: George Gilder, Author and Thinker

Discussing: The Wireless World and its Relationship to the Wireline. (1993)

George Gilder, autor, thinker and futurist; one of America's foremost telecommunications forecasters, shares his vision of communication, in which most regular persons can participate; "the portable digital phone, which will provide the average citizen with an unparalleled degree of access to one of society's largest information networks. Consider the validity of his forecast and examine today's realities.

**Three Perspectives on American Telecommunications Policy.
Are They Still Valid?**

Looking back at our telecom era, which is about to change radically, I put together for your viewing a series of KMB retrospectives on Telecommunications Policies and Practices.

As time goes by, and events change, many of the questions and issues in telecommunications remain the same. Are these perspectives still valid? You decide.

The March 2002 issue of the KMB Video Journal presents three perspectives for your consideration.
