ITP monitors and assesses legislation and shares that information with our members, policy makers, and the public. By working together, we can ensure that next-generation technology will thrive and Illinois tech consumers will have access to the cutting-edge products and services they demand.

At this kick-off event, ITP will moderate a discussion focusing upon the impact of public policy on business and technology. What is Illinois doing, or what should we stop doing, to make this a good place for tech?
